

# ADDING IT UP

## Investing in Sexual and Reproductive Health in the Caribbean

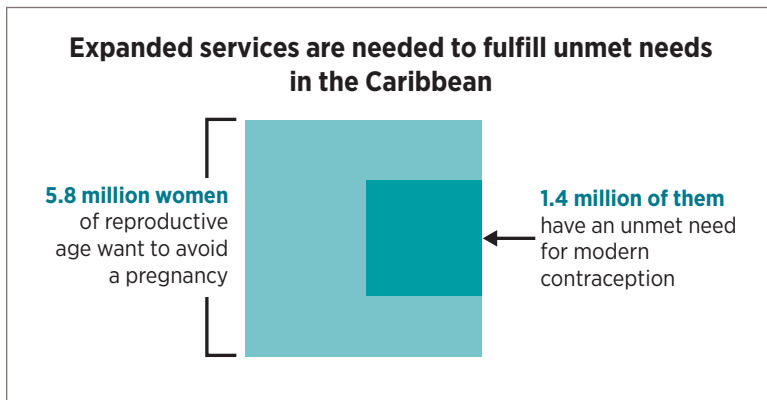

The Adding It Up study examines the need for, impact of and cost of fully investing in sexual and reproductive health care—services that together ensure people can decide whether and when to have children, experience safe pregnancy and delivery, have healthy newborns, and have a safe and satisfying sexual life.

**WHO:** Women of reproductive age (15–49) in seven low- and middle-income countries (LMICs) in the Caribbean in 2019

**WHAT:** Contraceptive services, maternal care, newborn care, abortion services and treatment for the major curable STIs

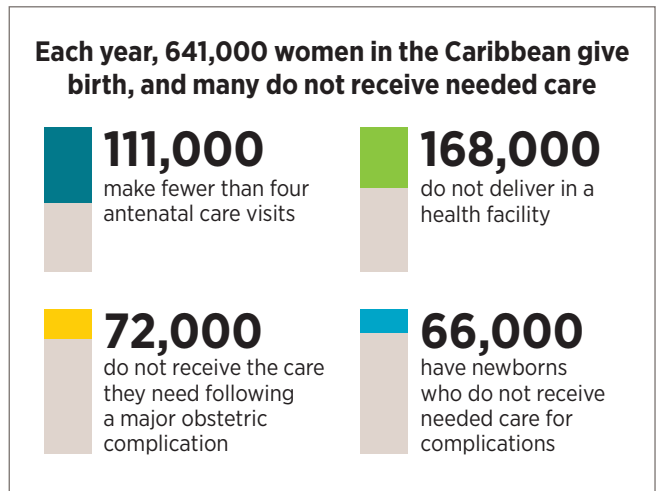

### Unmet needs for services in LMICs in the Caribbean

**Among women who want to avoid a pregnancy, unmet need is higher for adolescents aged 15–19 than for all women aged 15–49 (31% versus 24%).**

**Lack of high-quality sexual and reproductive health care puts women at risk.**

- 287,000 have abortions in unsafe conditions
- 1,600 die from causes related to pregnancy and childbirth
- 1.2 million do not receive the treatment they need for chlamydia, gonorrhea, syphilis and trichomoniasis

### Cost of meeting all service needs in LMICs in the Caribbean

**Every \$1 spent on contraceptive services beyond the current level would save \$4.68 in maternal, newborn and abortion care because contraception reduces the number of unintended pregnancies.**

\* Countries classified by the World Bank as having a 2018 gross national income per capita of \$12,375 or less. LMICs in this subregion are Cuba, Dominican Republic, Grenada, Haiti, Jamaica, Saint Lucia, and Saint Vincent and the Grenadines.

## Impacts of expanding and improving services

### Investing in sexual and reproductive health care in LMICs in the Caribbean would greatly reduce risks for women and newborns

	Annual no. at current levels of care	–	Annual no. if all needs are met	=	No. averted if all needs are met	% change if all needs are met
Unintended pregnancies	791,000		248,000		543,000	<b>-69%</b>
Unplanned births	307,000		85,000		223,000	<b>-72%</b>
Unsafe abortions	287,000		99,000		187,000	<b>-65%</b>
Maternal deaths	1,600		300		1,300	<b>-81%</b>
Newborn deaths	12,000		4,000		8,000	<b>-67%</b>
HIV infections in babies ≤6 weeks	650		80		570	<b>-88%</b>
Cases of infertility caused by untreated STIs	26,000		0		26,000	<b>-100%</b>

Notes: Based on 2019 data. Numbers are rounded. Percentage change was calculated from unrounded data.

### Investing for the future

- The interventions that make up the recommended care have proven feasible to implement in diverse settings around the world.
- Investing in them provides national and local governments, the private sector and international development partners with good value for money.
- By saving lives and improving women's health and well-being, sexual and reproductive health care benefits individuals and families and contributes to countries' social and economic development. Such care would also enable people to exercise their sexual and reproductive rights.
