^{*}Denominator is women 40–44. †Based on average number of abortions for three years preceding the survey. ‡Includes abortions performed in England and Wales.§Age defined as age attained during the year. **Based on survey of married women 20–44. ††Based on survey of women 15–44, from published report, calculated for three years preceding the survey. ‡‡Based on survey of women 15–44 in three locations, calculated for two years preceding the survey. The rates reported here are simple averages of the rates for all three sites, from published report. §§Based on 49,400 women. Rates are for an earlier year than the distribution shown in Table 1, because 1996 rates are not available. *Notes*: na=not applicable. The total abortion rate is the number of abortions that an average woman will have in her lifetime if she experiences the prevailing period age-specific abortion rates. *Sources*: See appendix.
