\*Number of abortions per 1,000 women in relevant subgroup. †Sum of births and abortions per 1,000 women aged 15-44. ‡Differs from previously published figures, which were based on state abortion reports. §Denominator is women aged 40-44. \*\*Includes separated women. ††Based on single women only. ‡‡Percentage of federal poverty level. §§Previously published AGI estimates of abortion rates by poverty status (reference 1) were inaccurate because of a programming error. \*†Previously published figures for Hispanics (references 1 and 7) have been adjusted according to state abortion reports. \*‡Limited to women older than 19. \*§Lim-
