

TABLE 4. Regional estimates of the annual number of postabortion cases treated and health care system costs (2006 US\$), using the WHO Mother-Baby Package costing spreadsheet, and minimum and maximum estimates from sensitivity analyses, according to actual or WHO-recommended standard practice

Region	No. of cases treated (in 000s)	Cost (in 000,000s)		Minimum sensitivity estimate (in 000,000s)		Maximum sensitivity estimate (in 000,000s)	
		Actual	WHO	Actual	WHO	Actual	WHO
Africa	1,730	\$114	\$141	\$99	\$112	\$188	\$298
Sub-Saharan Africa	1,180	\$68	\$76	\$68	\$76	\$128	\$203
Latin America	1,040	\$113	\$179	\$60	\$67	\$113	\$179
Total	2,770	\$227	\$320	\$159	\$179	\$302	\$476

Notes: Totals include figures for Africa and Latin America. Because of rounding, the maximum sensitivity estimates do not add up to their totals.
