\*Estimates are based on data from a nationally representative survey of women aged 15–44, except in South Korea (married women aged 20–44) and Turkey (ever-married women aged 15–44). Estimates reflect the average for the three years preceding the survey, except in Taiwan (preceding year) and in South Korea and Turkey (preceding five years). Number of abortions was calculated from the abortion rate, except in Taiwan (calculated from total abortion rate). Numbers and rates may include a small number of illegal abortions. Estimate may include spontaneous abortions. #Data are for April 2008–March 2009. \$Data do not include menstrual regulations. \*\*Data are for July 2005–June 2006. *Notes*: Numbers of abortions per 1,000 women aged 15–44. Unless otherwise noted, all figures are based on data from official country reports, United Nations *Demographic Yearbook* or World Health Organization's European health for all database.
